

AMENDMENTS TO THE CLAIMS

Please cancel claims 1, 5, 8 and 11 without prejudice or disclaimer of the subject matter set forth therein.

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of claims:

Claim 1. (canceled)

Claim 2. (currently amended) The molding composition according to claim ~~1~~ 9, wherein said Component (A) is a fibrous material.

Claim 3. (currently amended) The molding composition according to claim ~~1~~ 9, wherein each of said Component (B) and (C) has an iodine value of 70 to 150.

Claim 4. (currently amended) The molding composition according to claim ~~1~~ 9, wherein the contents of said Component (A), the sum of said Components (B) and (C), and said Component (D) are from 29 to 99% by weight, from 0.5 to 70% by weight, and from 0.1 to 30% by weight, respectively, based on the total amount of the composition.

Claim 5. (canceled)

Claim 6. (currently amended) The molding composition according to claim \pm 9, wherein each of said Components (B) and (C) has at least one addition-polymerizable unsaturated group in an amount of 35 to 70% by weight based on an amount of constituent monomers of each of said Components (B) and (C).

Claim 7. (currently amended) A molded article obtained by molding the molding composition according to claim \pm 9.

Claim 8. (canceled)

Claim 9. (currently amended) A molding composition consisting essentially of:

- (A) an aggregate; at least one of
- (B) a linear unsaturated polyester and
- (C) a linear unsaturated polyester polyamide; and
- (D) a radical generator,

wherein each of Component (B) and (C) has a content of an alkylene (having from 2 to 4 carbon atoms) oxide adduct of bisphenol A (average added number of mols: 1 to 10) of 3 to 40 mol% based on an amount of constituent monomers of each of said Components (B) and (C)

and wherein component (B) has a softening point of 80°C to 130°C;

and wherein component (C) has a softening point of 80°C to 130°C.

Claim 10. (previously presented) The molding composition according to claim 9, which is for production of cores of automobile interior materials, sound absorbers of air conditioners, glass mat, and constructional insulators.

Claim 11. (canceled)

Claim 12. (currently amended) The composition of claim ± 9, wherein the polyester resin has a softening point of 93°C or above.
